

Powering America's energy future

Central Maine Power (CMP), a member of the Avangrid family, serves approximately 670,000 customers across 346 communities in central and southern Maine. With a commitment to the well-being of the CMP community, we deliver reliable, safe and efficient energy through innovation for our stakeholders.

Our service area

CMP's 11,000-square-mile service area is larger than the states of Massachusetts and Rhode Island combined. It contains about 78% of Maine's population and major commercial and manufacturing centers.

We trace our origins to November 7, 1899, when founding partners, attorney Harvey Eaton and engineer Walter Wyman, bought a hydroelectric generator providing street lighting and service to about 100 customers in the village of Oakland, Maine. They soon began a long program of expanding their service area through interconnection and acquisitions, and began using the name Central Maine Power in 1910.

Since its founding, CMP has delivered billions of kilowatt-hours of electricity to more 670,000 homes and businesses across Maine.

Reliability

Investing in the safety and reliability of service to meet the needs of our customers

Innovation

Leveraging the power of technology to transform the energy system

Facts at a glance

2,881 miles of electric distribution lines

33,165 miles of electric transmission lines

1 million population served

205 substations

1,132 employees

670,520 electric customers

14 counties, 346 cities, towns, townships and plantations served

Meet the CEO

Joseph A. Purington
President and CEO

Joe Purington was appointed President and CEO of Central Maine Power (CMP) in September 2021. As a Maine native, Joe spent his early career at CMP where he served in a variety of different roles including Director of Distribution Operations. In 2014 he joined

Eversource New Hampshire and in January 2020 became President, New Hampshire Operations. Purington earned a bachelor's degree from Southern New Hampshire University and an associate degree from Southern Maine Vocational Technical Institute. He is actively engaging with communities and organizations that support other Mainers statewide.

Working together to deliver a more accessible, reliable, safe and efficient energy model.

Agile

We act efficiently and with passion to drive innovation and continuous improvement at both the local and global level.

Collaborative

We work together toward a common purpose and mutual benefit while valuing each other and our differences.
