

# Tree Care Specifications

## New Construction and Upgrades

Trees are among Maine's greatest natural resources and Maine is the most heavily-wooded state in the nation. Our local Arborists and Tree Care crews work to maintain the natural beauty of our State and assure reliable service to you.

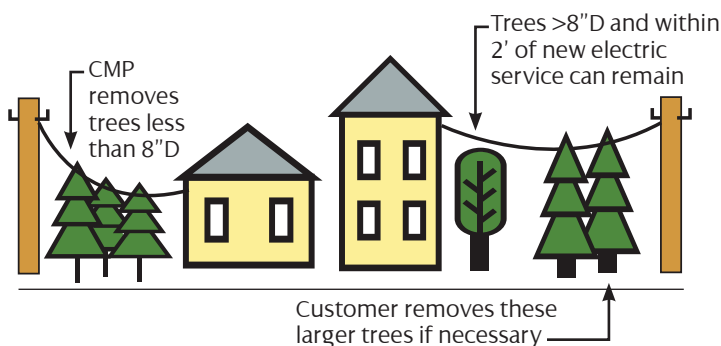

### Providing safe, reliable electricity delivery service to you

As part of our ongoing effort to provide you with safe and reliable power, our expert Tree Care crews will consider the following for your new construction or service upgrade:

- Remove all small branches within 2 feet of the electric service location

- Remove trees less than 8 inches in diameter that are in line with the electric service cable that can't be properly topped or trimmed to accommodate the cable

Trees **greater than 8 inches in diameter** can remain **within 2 feet** of the new electric service provided they are not interfering with the cable.

### We're here to help you

We look forward to meeting your electricity delivery needs. Please don't hesitate to contact us at **800.750.4000** with any questions you may have.
