[Welcome to Energy Manager for Business!](#)

Energy Manager for Business displays smart meter usage information for medium, industrial and large customers.

Energy Manager for Business is refreshed each morning. During the time of the refreshing process no data will be available. In the event that you cannot access data early in the morning please wait an hour and log back in.

Data displayed will be as recent as approximately 28 hours old (at 6:00 am you will have access to data up to midnight of two days previous).

We have developed a tutorial to help you in creating reports about your electricity demand and usage and it is available from the About Energy Manager page and directly from the home page of Energy Manager for Business.

We hope that you find this information to be very beneficial!

[Continue](#)

3. The first time you view your data you will see this welcome screen that includes some useful reminders about the product. This is the only time you will see the welcome page.

Energy Manager for Business: Home screen

Home Energy Analysis

The Energy Analysis tab has choices to view Load Analysis, Usage and Variance and Trending reports

Welcome to Energy M

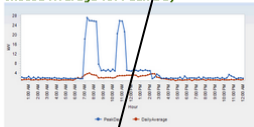

Click title to access reports

The following reports are available:

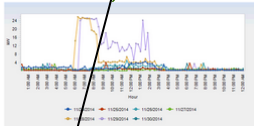

Load Analysis

- The [Load Analysis](#) report shows the distribution of the total demand for electricity for a single meter over a period of time.
- View up to thirty days of data
- Compare peak day to average day
- Look at weekdays or weekend and holidays separately
- View a [load curve](#) chart of your electricity demand

Choose Average vs. Peak Day

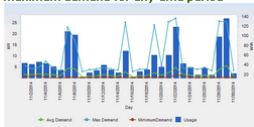

Choose Actual Daily

Usage and Variance Analysis

- Usage and Variance Analysis shows comparative usage and [demand](#) charts and graphs.

View usage, average demand and maximum demand for any time period

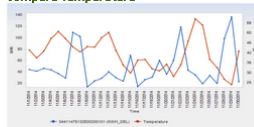

- Compare time periods like this month to last month or the same month last year
- Compare electricity usage and

Trending

- The trending report shows usage (kWh) or demand (KW)

Compare Temperature

- You may choose to display weather data such as temperature or [heating and cooling days](#)
- With the [Excel](#) link, you can download up to two years of your smart meter data into a spreadsheet
- With the [Green Button](#) link, you can download your data into an xml file to share with a third party

Tips

This website contains information about all of the accounts registered to your CMP profile. Below are tips to help navigate each of the reports available.

In each report:

- Choose "Select meters" and click on the meter number.
- If you have more than one account then choose "Switch Customer", enter the account number you wish to view then choose "Select."
- Fill out the choices for time period and other options.
- Click "Create Report."
- Use Excel or PDF links to view a report that can be printed or saved to your computer.
- If you can't see the options to export to PDF or Excel in each report, please scroll to the right.

Links

Tip: You will always be brought to the home screen. The home screen shows useful reminders about how to navigate Energy Manager for Business.

Settings Advanced Load Analysis

Print PDF Excel

1. Select meters
02210216706E00100101 1/12/2012-9/16/2014
Select Meters

2. Select time period
Time Period: Month to date
Start Date: 9/1/2014
End Date: 9/18/2014
Previous period Next period

3. Select load profile view options
Load profile type: Actual daily
Day types to include: All Days

4. Create the report
Create Reset

1. Click on "Select Meters" to choose your meter or switch to a different meter.

2. Choose a time period. Custom periods cannot be greater than 30 days.
Tip: Demand readings for greater than 30 days can be exported into an excel spreadsheet through a Trending report

3. Select load profile view option

4. Choose type of days to include:

4. Click "Create" to create your report.
Tip: each time you change one of the parameters you must create the report again.

Load profile view options:
Actual daily
Weekly average
Monthly average
Average and peak day

3. Select load profile view options:
Load profile type: Actual daily
Day types to include: All Days

4. Create the report:
Sunday
Monday
Tuesday
Wednesday
Thursday
Friday
Saturday
Weekdays
