

TTC/ATC/TRM/CBM values for CMP's non-PTF Transmission Path

Path	TTC	ATC	TRM	CBM
CMP_ISNE	9999	9999	0	0

Non-firm transmission service under Schedule 21 is always available. Therefore, it is unnecessary to post daily non-firm service that has become available as a result of not scheduled firm transmission service.

TRM and CBM are presently set to zero will be reviewed as appropriate (at a minimum annually) to verify the values.

If a non-PTF path becomes constrained and the yearly or monthly ATC value changes because of a 10 percent or more change in TTC, CMP will post a narrative for such path.
