A cool way to track your energy use

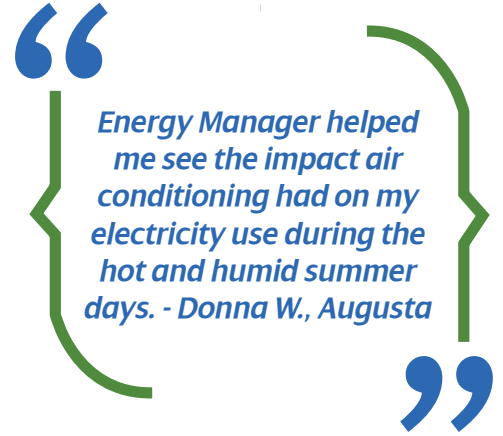

Our **FREE Energy Manager** and **Usage Alerts** services are cool power tools that take data collected from your smart meter and help you save on energy costs.

If you're using an air conditioner or heat pump for cooling, or drying wet towels from the pool, with **Energy Manager** you can:

- View your usage by the month, day or even by the hour
- Track your energy use online and see a breakdown by category
- Learn ways to save

Usage Alerts can help you manage your energy use while you're on the go.

- Receive weekly alerts about your energy use by text, email, phone – or all three
- Get an alert if you exceed a set amount of usage or cost
- We'll notify you of any changes in your daily use so you can investigate

For cool savings on your electricity costs this summer, sign up for **Energy Manager** and **Usage Alerts** at cmpco.com.

Get Outage Alerts specific to you
