*The total cost per kWh for residential Rate A customers taking Standard Offer Supply is 14 cents. Actual cost per kWh may vary depending on your delivery or supply price - check your bill for your actual price per kWh.*

## Energy-efficient heat pump water heater rebates

When you're ready for that morning shower, an energy-efficient heat pump water heater can provide plenty of hot water and can help you save on water-heating costs. Don't have a heat pump water heater? Visit [efficiencymaine.com](http://efficiencymaine.com) and search heat pump water heater. **You could save \$750 with a rebate.**

## Manage your energy bill anytime, anywhere with our Mobile App

With our FREE **Mobile App**, managing your account is easy, convenient and many of our great services are available right at your fingertips.

With our app you can:

- Enroll in **eBill**, **AutoPay** and **SimplePay**.
- **View** and **pay** your bill.
- **Report an outage** and know your **Estimated Times of Restoration** automatically so you can plan.

To download our **Mobile App**, just text **APP** to **267-898** and we'll send you a link to download the app quickly and easily.

## New assistance program available

If you rent your home and need assistance with your electric bill, new funding is now available through Maine's **Emergency Rental Assistance** program.

You may be eligible for assistance if you meet all of the following:

- You rent your home, apartment, or the lot that your home is on.
- At least one person in your household qualified for unemployment benefits, or had their income reduced, had significant costs, or experienced other financial hardship due to the pandemic.
- Your household income is at or below 80% of the median income in your area.
- You are having difficulty paying your rent or utilities.

For more information about the program please visit [mainehousing.org](http://mainehousing.org).

## Taking reliability to new heights

We are committed to providing high-quality, reliable power and we continue to improve our inspection and maintenance practices on our system.

Drones have become one of the many innovative tools we use to quickly and efficiently perform inspections of substations and transformers. Drones allow us to safely scan and evaluate large areas of our system while it is still energized. We can identify issues and resources needed for maintenance or repair, and perform the work safely in a shorter period of time.

Jim Wright, Supervisor, Transmission Operations and Maintenance, holds the drone that located a fallen tree on a remote stretch of our transmission line during a storm last winter near Skowhegan. (photo courtesy of Coutts Bros.)

## The power to give

## Community Spotlight

In honor of National Pride Month, we are proud to support the EqualityMaine Foundation as a top-level visionary sponsor with a donation of \$20,000 to support community educational programming and services. Our values align with EqualityMaine as we strive to create safe, welcoming environments that promote equality for LGBTQ citizens in our workplace and communities.
