

ME EBT Change Request**2003-002**

Requester Name: James Grace	Company Name: Select Energy	Phone # :
Date of Request: 02/12/2003	Affected EDI Transaction Set #(s): 814-3, 814-4, 814-5, 867-1	E-mail Address: gracejl@selectenergy.com
Requested Priority Medium	Requested Implementation Date:	Status: Working

Brief Explanation:

The Independent System Operator for New England (ISO-NE) has established 8 zonal areas within the New England Power Pool in support of FERC's Standard Market Design rules. Each customer will be associated to a zone within the ISO as determined by the Local Distribution Company. Energy will be delivered to these zones, for customers within the zone, by their energy suppliers. The zone is a new attribute of a customer's account that needs to be provided to the Energy Supplier to enable them to manage their supply. The REF*SPL is currently used by PJM and NY to send similar information on electric enrollment EDI transactions. It has been added to MA.

Detail Explanation:

The Zone is an Account level attribute of a customer and is established by the LDC according to guidelines defined by ISO NE. This attribute will be returned as part of a successful enrollment response (814-4) to a supplier enrollment request. If the Zone is changed by the LDC, during the period served by the supplier, an 814 Change transaction (814-3) will be issued by the LDC with the new REFSPL identified. The REF*TD segment 02 will contain REFSPL. The Zone would also be issued on a MOVE transaction and a successful response to a Historical usage request. While all of Maine currently is one Zone, the ISO could add additional zones in the future, or move to Nodal settlement in the future; having the segment in place facilitates future changes. Adding this segment would be consistent with other states enrollment transactions. This allows more consistent back-office processing for Energy Suppliers (who operate in multiple states) to add this attribute to their customer records.

Example: REF*SPL**MAINE;
