

ME EBT Change Request	2005 – 01 Revised & Resubmitted
------------------------------	--

Submitted by / Date: Natalie DiGregorio/Constellation NewEnergy 04/25/06	Affected EDI Transaction Set(s): 814-4, 814-3, 814-5, 867-1
Priority: High	Requested Implementation Date: On or before October 2006

<p>Brief Explanation: Provide suppliers with customers’ ICAP value (ICAP Tag) with enrollment with the historical usage requests, and provide change transaction if/when the value changes.</p> <p>Detail Explanation: Request is that the LDC’s provide suppliers with the customers ICAP Tag. The ICAP Tag is the capacity value, assigned to each customer by the LDC, for a power year and is determined based on the customer’s contribution to ISO-NE’s Peak load. Current capacity values are assigned based on the ISO-NE peak 8/30/04 @ 1600 hrs and are valid for the power year 6/1/05 to 5/31/06. New values will be based on the peak 7/27/05 @ 1500 hrs and become effective 6/1/06. This value is needed to determine each customer’s assigned capacity, value/cost, and total supplier capacity.</p> <p>Request would require modification to: 814-4 Enrollment Response – successful 814-3 Change Distribution Company Data 814-5 Customer Move Transaction 867-1 Historical Usage</p> <p>Suggestion to look at using the “AMT KC” segment as it is U.I.G. approved.</p> <p>Discussion Items:</p>
